

Efficiency. Inspired.

Arkema is a leading producer of organometallic catalysts

Marketed under the tradename Fascat®, these products are used in the synthesis of additives and resins, as well as urethane and silicone crosslinking reactions.

The Fascat® catalysts product line is supported by a strong global sales and marketing network, an experienced process technology and applications group, and global product facilities.

Long recognized as a technology leader, Arkema is dedicated to understanding your needs and working with you to improve productivity and create value for you and your customers.

Fascat® catalysts improve product quality and consistency and lower overall production costs because they are highly selective catalysts that increase reaction rates, lower reaction temperatures and simplify overall processing.

Fascat® catalysts are used in the following applications:

- Alkyd resins
- Monomeric esters
- Saturated polyester polyols
- Saturated polyester resins
- Silicone caulks and adhesives
- Specialty acrylates
- Unsaturated polyester resins
- Urethane coatings

A FAMILY OF ESTERIFICATION, TRANSESTERIFICATION, POLYCONDENSATION, AND CROSSLINKING CATALYSTS

FASCAT® 2000 SERIES - stannous tin catalysts. Typically insoluble in the finished product, these catalysts are primarily used to produce monomeric esters and fatty acid esters.

FASCAT® 4000 SERIES - organotin catalysts. Typically incorporated into the final product, these catalysts are primarily used to produce saturated and unsaturated polyester resins, alkyd resins, and specialty acrylates. The Fascat® 4000 series is also extensively used in urethane and silicone crosslinking reactions.

FASCAT® 9000 SERIES - organotin catalysts. This series is used in resin production and crosslinking reactions where FDA certification is required.

CUSTOMER SERVICE

A commitment to servicing your needs is not just our promise, it is part of our mission statement. Our objective is “one call” customer service. That’s why Arkema has invested in the latest technology. Our totally integrated materials management system ensures our service is one of the best in the industry. Call us at 1.800.331.7654.

GLOBAL PRODUCTION CAPABILITIES AND DEPENDABILITY

Arkema has the capability to deliver what you need, when you need it... worldwide. We have ISO certified Fascat® catalyst production sites in Carrollton, KY and Vlissingen, The Netherlands.

PILOT PLANT FACILITIES FOR PROCESS AND PRODUCT DEVELOPMENT

Arkema has two pilot plants, one in Carrollton, KY and another at our research and development center in King of Prussia, PA. Both are designed to help understand the technology needs of our customers and integrate this into the development of new products and improved processes.

DEVELOPMENT PARTNERSHIPS - R&D

Arkema focuses on developing strong partnerships with our customers, emphasizing teamwork and continuous improvement of our products and services. We have outstanding resources and capabilities to help meet your specific needs. Let us demonstrate what partnering with us could mean to you.

TECHNICAL SERVICE

Arkema provides experienced professionals and technical service to assist our customers. Our technical service team is committed to being the best in the industry. Contact us on our website at www.fascat.com - we'll prove it.

APPLICATIONS

Highly selective catalysts designed to improve product quality and lower manufacturing costs, Fascat® catalysts can be used in a variety of applications. Let us find one to suit your needs.

ADDITIVES

Plasticizers for PVC where flexibility and strength are critical.

Gel coats for smooth, high-gloss protective coatings.

SYNTHESIS OF MATERIALS FOR PAINTS AND COATINGS

Alkyd resins for economical, easy-to-use paints and finishes.

Saturated polyester resins for exterior finishes with excellent weatherability.

CROSSLINKING CATALYSTS

Electrocoated protective coatings for long-term chip resistance and corrosion protection.

Urethane finishes for fast, economical auto repair.

Silicone sealants for easy-to-use, water-resistant caulks.
