

HEALTH, ENVIRONMENT AND SAFETY POLICY STATEMENT

The Arkema Inc., Calvert City manufacturing facility is committed to providing a safe and healthful worksite for all employees, vendors, contractors, visitors, and the local community, and to environmental excellence in the performance of all its activities. All plant activities will be conducted in a safe and environmentally responsible manner to minimize risk to employees and the public. As part of this effort, the facility has developed and implemented sound health, safety, and environmental programs to ensure Compliance with both the spirit and letter of all applicable federal, state, and local rules and regulations as well as corporate and other requirements to which the plant subscribes.

Plant management is responsible for the development and implementation of written health, safety and environmental policies and procedures, Pollution Prevention and waste minimization or elimination programs, employee training and development programs, security systems, mechanical integrity and preventive maintenance programs for plant equipment, risk management systems, fire prevention and suppression, and adherence to sound and recognized engineering practices. Internal evaluation systems have been developed to ensure Continual Improvement in all facets of the facility health, safety, and environmental programs.

Responsibility for creating and maintaining a healthy and safe work environment is considered a condition of employment at the Calvert City facility. All plant employees are encouraged and expected to participate in the development of these programs and for the strict adherence to the policies and procedures associated with these programs. Plant objectives and targets, and where practical, methods to measure environmental and safety performance are developed annually to anticipate, recognize, understand, and control all risks and hazards in our facility operations to ensure continual improvement.

We are committed to producing only products that can be manufactured, transported, used, and disposed of in a safe manner. We will provide our customers and the community with appropriate health, safety, and environmental information to enable them to use, handle, and dispose of our products in a safe manner.

The facility will promote open communication with the community in which we operate, and other interested outside parties, in order to gain an understanding of and be responsive to concerns of our neighbors.

Jeff Hall, Plant Manager
